

## Laptop Carts - Standard and High-End

With these trolleys for laptops, caregivers can easily move their mobile devices to the point of use.

They are very compact, lightweight and agile. The laptop trolleys roll effortlessly across different floor types and fit nicely into small work spaces, such as examination rooms and offices.

Both models can be equipped with additional accessories. The High-End model can additionally be fitted with medication drawers and locking mechanisms.

These high quality, stable and ergonomic **laptop trolleys** are a simple solution for the well-being and productivity of the caregiver. They are made of durable materials and easy to clean.

### » Ergonomic functionality

This simple, intuitive trolley is designed for sitting or standing use. For users of different heights, the height can be adjusted with one easy movement of the hand. The trolley underwent movement tests with 10,000 cycles, which guarantees trouble-free height adjustment for at least five years.

### » Highly maneuverable and compact

You can effortlessly move the trolley to the point of use. Thanks to the ultra-smooth swivel wheels, it moves easily over different floor types. The trolley has a small footprint and is perfect for rooms and corridors with limited space.

### » Suitable for a diverse range of laptops

The design accommodates most laptops, even widescreen up to 17.3 inches. The portable sits in lockable, ventilated storage and the notebook bracket prevents vibration.

### » Plenty of worktop space and a perfect wrist position

Despite its compact footprint, the Laptop trolley offers plenty of free worktop space. The backward tilting and left/right 90° rotating keyboard work surface with integrated left/right sliding mouse work surface keeps the wrists in a neutral position. This prevents injuries and increases comfort.

### » Unique cable management system

Thanks to ingenious cable fixing slots, the keyboard and mouse cords are hidden and guided into the CPU compartment. With all cabling hidden away in the CPU compartment, cleaning becomes easy and you have a "clean" laptop trolley.

## » Two different models

The Laptop trolleys are available in a Standard and a High-End version. The table below lists the features of both:
