

LiFePO4 battery

LiFePO4 battery technology is a sustainable and safe solution. This technology offers the user important advantages such as fast loading, a large autonomy per unit volume and a long service life. Important safety aspects such as over voltage, short-circuit protection and temperature control have been integrated into the battery.

This battery can be used in various mobile applications.

» Specifications

Nominal Voltage	12 V
Nominal Capacity	40 AH
Weight	4,2 kg
Length	160 mm
Width	85 mm
Height	170 mm

» This LiFePO4 battery is protected by a Battery Management System including:

- Temperature sensor
- Maximum current protection
- Maximum charging voltage protection
- Over discharging protection
- Short circuit protection
- Cell balancing

This LiFePO4 battery should be used in combination with the Belintra COW Controller.
