

T-clear medication bins

The transparent, injection moulded bins are mainly used in the Medicart to dispense medication but can also be used in all our other modular products.

The trays are a modular, orderly and ergonomic solution to the general management of your medication distribution process.

They can be subdivided by means of dividers to cater for the various dispensing times per patient. The front of the tray comes with a space to insert a label into.

New! A tray with bins is now also available for the Medicart Drawers Small, so that this medication trolley can also be equipped with the handy medication bins.

Our medication distribution trays have been designed to fit individual bins per patient and to cater for the various dispensing times a day.

» Label holder at the front

The handle at the front comes with a space to accommodate a label. The holder clicks open easily so that the label can be swiftly inserted and replaced.

» Easy to subdivide

The T-clear bins come with little slots where the dividers fit into. These dividers slide smoothly in and out so that the trays can easily be subdivided. As they are completely transparent, users can immediately check their contents.

» Modular use

The dimensions of the bins are such that, depending on the type, an tray can accommodate 3, 4 or 6 T-clear bins.
