

Linen and waste treatment

Linen and waste collectors

The stainless steel collectors allow for easy and hygienic collection of dirty linen and waste. By equipping the linen collector with a bottom plate, it can be used as a waste collector. The mobile collectors are available in different sizes and types for different purposes.

All models are made of stainless steel and all welds are welded all around for optimum strength and hygiene. When you choose a linen or waste collector with lids, you can choose the colours of the lids and specify these with the order.

The collectors are equipped with rubber Care rings which are designed for bags of approximately 600 x 1000 mm (measured flat).

Thanks to the rubber Care ring, the bags are securely and hygienically attached.

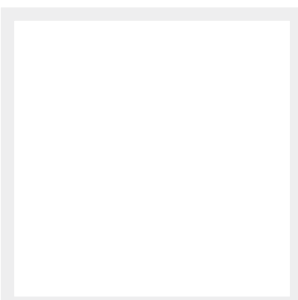

» Rubber Care ring

The rubber Care ring ensures that the linen or waste bag remains securely and hygienically in place. It is designed in such a way that the outside of the bag cannot get dirty and the ring is easy to clean.

» Pedal operation

The pedal mechanism consists of nicely rounded parts. The system is ergonomic, robust and maintenance-free.

» Soft-closing system

The hinge has no weak points and is equipped with an integrated soft-closing system. The soft-closing system ensures that the lid closes quietly and gently.

Shutty Waste Collectors and Coupled Shutty

The Shutty is suitable for the airtight collection of waste. The waste collector opens and closes thanks to the pedal control, partially covered with plastic.

When opening the Shutty, the car locks automatically and can no longer roll away.

The airtight sealing ring has a clamp for waste bags of 575 x 1000 mm (measured flat) with a capacity of 70 litres.

The coupled combination collectors are designed for collecting dirty linen and waste. They combine the collector and the Shutty.

The simple and sturdy mechanism of the waste collector ensures that the waste bag always remains airtight closed.

» Airtight sealing ring

The rubber sealing ring ensures that the waste bag always remains airtight. Thanks to the pedal mechanism, the ring can be opened easily and hygienically.

» Extra clamp

The Shutty is equipped with an extra plastic clamp, so that waste bags are kept in place during transfers.

» Stainless steel design

The frame is made of stainless steel so that the Shutty can be completely cleaned.

Shelved trolleys: Open - Closed - Linkable

The 1-part shelved trolleys are used for the distribution of clean linen. The 2-part can be used for the same and simultaneous collection of dirty linen.

The rugged frame is made of AISI 304 stainless steel (1.4301) completely TIG welded at all joints to avoid water infiltration and dirt collection, ensuring perfect hygiene. Bottom, shelves and dividing wall are made of 18 mm thick wood panels, covered with melamine sheet and with ABS profiles along the edge. The two tubes running above the worktop build a comfortable push handle.

We can also offer different types of shelf trolleys in our range. Please contact your account manager or our customer service to discuss the wider range.

Waste transport trolleys

These aluminium trolleys are used to collect dirty linen and waste.

The inside of the car can be easily cleaned with water, as the optional drain valve ensures that the water can drain easily.

The waste transport cart is equipped with a lid and a front panel that partially folds down to facilitate loading and unloading.

» Front panel

The waste transport cart is equipped with a lid and a front panel that partially folds down to facilitate loading and unloading.

» Closure

The closure on the hinge blocks the lid when open so that it cannot fall shut.

» Drain tap
