

# Height Adjustable Packing Tables

# Packing Table

- Adjustable height = Ergonomic as it can be fitted to people's anatomy and the type of task to be performed
- Proven concept - on the market since 2008

# Product characteristics

- Individually height adjustable
- Ergonomic
- Solid
- Hygienic
- A myriad of accessories to fulfil various needs

## Height adjustable with control panel

The height is adjusted by pressing 2 buttons.

The control panel has three memory presets, which makes it possible to memorize three different heights. This is very convenient when the table is used by different people.

# Ergonomic

- Electronically height adjustable for usage both in standing or seated position
- The control panel for the adjustment of the height can easily be reached
- The height is smoothly (stepless) adjustable between 765 and 1265 mm

# Solid

## 1. Columns

- 2 robust lifting columns in anodized aluminum
- Each column can sustain a weight of 150 kg
- In case of overload, the lifting columns block automatically

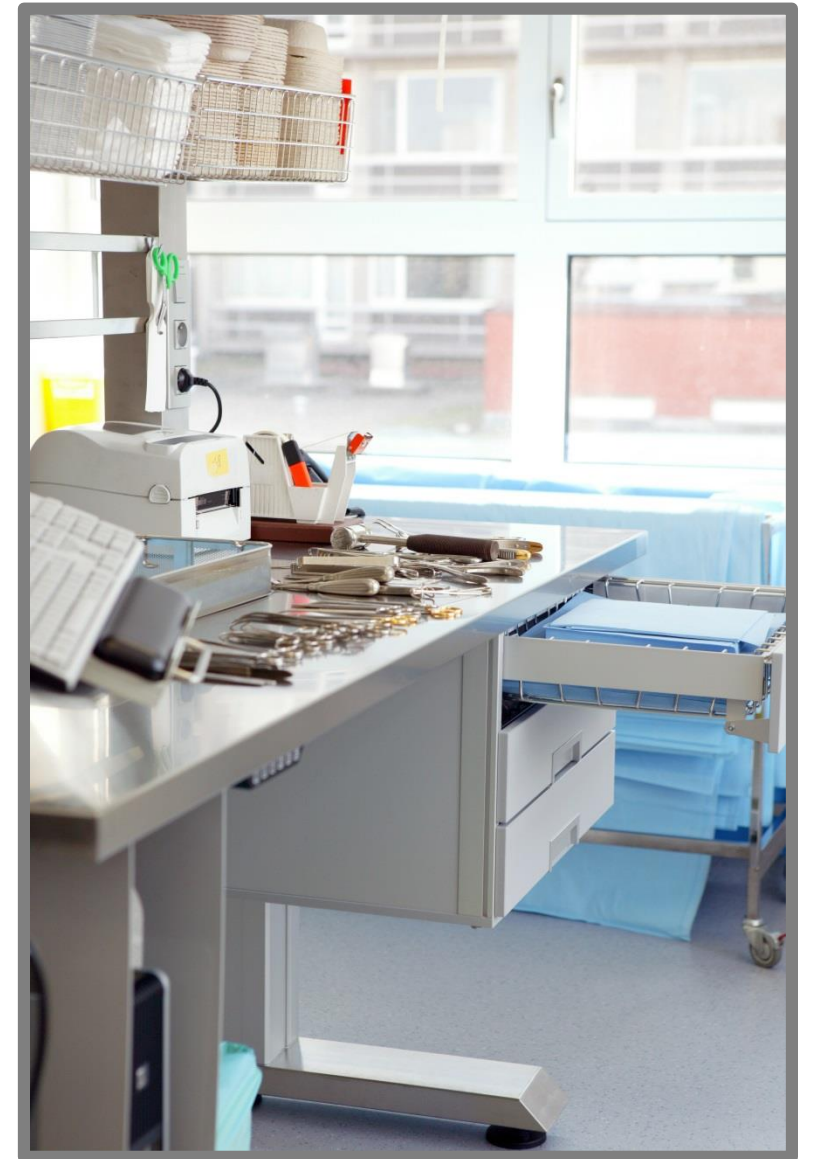

## 2. Feet

- The feet of the table are manufactured from stainless steel

# Hygienic

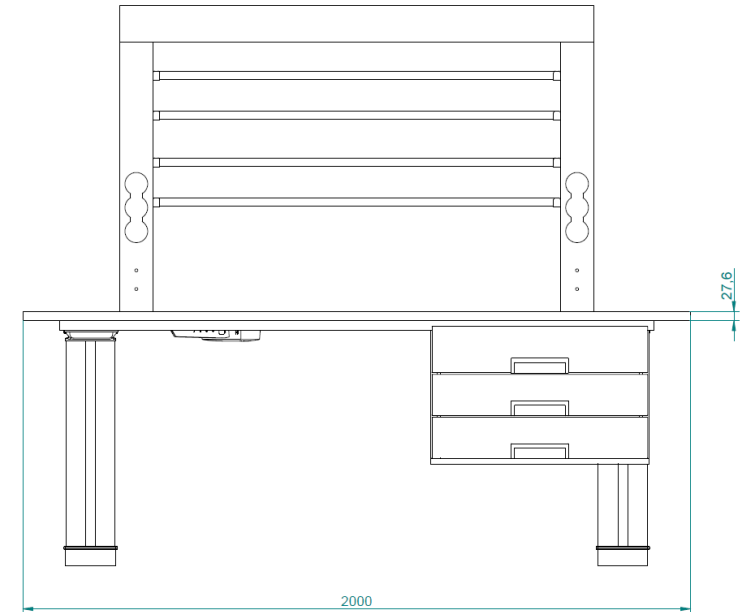

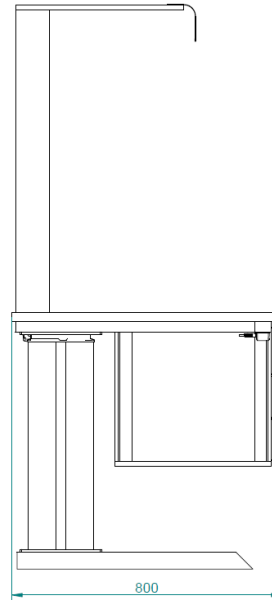

- The tabletop is made from hygienic water resistant materials of choice:
  - Stainless steel (20 mm thick)
  - HP Laminate (13 mm thick)
- The materials used are resistant to corrosion, to all the frequently used solvent and disinfection products, as well as to UV and heat.

# Worktop dimensions

Possible dimensions :

- 1800 x 800 mm
- 1800 x 1000 mm
- 2000 x 800 mm
- 2000 x 1000 mm

## Accessories: Drawer Unit

- A drawer unit containing three drawers can be installed under each worktop
- Fitted with three ABS modules (600 x 400 x 100 mm)
- The drawers are equipped with high-end telescopic rails, a “soft-closing” mechanism and a closed frame

# Accessories: Upper structure

1. On top of the table, a stainless steel upper structure can be installed for the attachment of baskets or trays, to stock small material
2. The upper structure can also be equipped with a LED light (220V) and with or without cutting device
3. In the feet of the upper structure (on both sides of the table) electric sockets, switches or UTP connections can be provided (CEE7/5, type E)
4. The upper structure can be equipped with a flex arm for a portable or a monitor screen
5. A computer holder under the table and a retractable drawer for a keyboard are also optional

## Technical specifications

- The electrical supplies which Belintra can be deliver are 220V – 50Hz AC
- Sockets, switches and/or UTP connections come with earth pin type CEE7/5, type E
- If another type of electrical supply is required, this should be sourced locally.
- For more details, please refer to the Technical Sheet
